SADDLE PAD DIVISION

quality for performance

UNIQUENESS · CLASS · FUNCTIONALITY

for equestrian sports and lifestyle

MADE IN ITALY SINCE 2020

SADDLE PADS FOR EVERY TASTE AND NEED, ENHANCING PERFORMANCE.

100% ITALIAN QUALITY.

In May 2023 we are finally ready for the official launch of Knots Equestrian Saddle Pad Division.

The release of the collection has taken time and effort: after several request coming from our customers, we took the first step of this project in August 2022. Since then it has been a fascinating journey of learning and discovery, a long research with one aim: offer premium quality for exceptional performance.

We asked **expert riders** what their needs and expectations from a saddle pad are; compared the findings of different **tests** and **studies** about paddings and their effect on performance; researched the market for the best Italian materials and collaborated with artisans boasting **decades of experience** in both fashion and sports industry.

Once again, we can proudly state that all our products are completely made in Italy and every step of the production is carefully supervised by the attentive eye of Knots Equestrian crafters.

All models have been designed keeping comfort, functionality and elegance of the look in mind.

We offer **different product lines, each focusing on specific properties and technologies**, thus targeted at different kinds of riders.
We believe that everyone has its own point of view when it comes to what type of pad they want to use for their horses - it depends largely on saddle fit, performance needs and personal taste.

Whatever you are looking for, we are sure that from our range of materials and customisation options you will find a great solution for you and your horse.

Bringing technical innovation and craftsmanship together.

What makes our Saddle Pads unique in their kind is the meeting of modern **productive technologies** and craftsmanship.

We make use of **cutting-edge industrial techniques to obtain a durable, technical and smart looking quilt.**

But we do not stop here. Knots Equestrian was born from praising **the art of handcraft.**
We wanted to stay loyal to this value that has always characterised us - this is the reason why **50% of the process is still handmade.**

This allows us to create customised sets meeting even the most peculiar customer desires and guarantees that every saddle pad is finely finished and every detail is worked out with care and devotion.

CORNERSTONES OF OUR PHILOSOPHY
AND HOW WE STICK TO THEM.

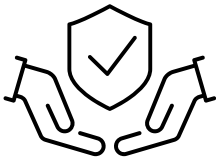

SUSTAINABILITY : every detail is designed by us and the quilt is specifically produced for us in a local Italian establishment close to our headquarters, while all the finishes are made in our own KE laboratories. This allows us to perform **constant quality control** and product development , as well as **cut energy waste** linked to transportation. Knots Equestrian products are 100% locally sourced and **made in Italy**. We are strongly convinced that this is the only way to sustainably build a brand and a future for the planet.

EXPERTISE : we work with laboratories boasting decades of expertise in quilting and fabric processing.

FUNCTIONALITY : we offer different product lines with **specific properties** to meet the requirements of top sport and different riders.

QUALITY : we use only the best Italian materials and we are meticulous about processing techniques.

AT A GLANCE

TWO LINES: DIFFERENT TECHNOLOGIES TO MEET YOUR NEEDS

QUICK MOISTURE-WICKING TECHNOLOGY

- **Hypoallergenic**, **antibacterial** cotton blend top layer.

- Cotton **honeycomb lining** for optimal moisture-wicking performance and absorbency.

- Lighter, 400 g breathable wadding, guaranteeing maximum **breathability and faster drying.**

- Hexagon-rhombus quilt.

SHOCK ABSORPTION TECHNOLOGY

- Internally and externally made of **hypoallergenic**, **antibacterial** cotton blend.

- Padded with **heavier** 900 g breathable shock absorbing layer.

- Optimum **shock absorption**.

- Straight line quilt.

QUICK MOISTURE-WICKING TECHNOLOGY

This elegant Saddle Pad with hexagon-rhombus quilting has a top layer made of hypoallergenic, **antibacterial** cotton blend and a lining made of cotton honeycomb for optimal moisture-wicking performance and absorbency. The saddle pad lining is in natural colour , so it will not release any dye or pigments when the horse sweats. All fabrics are non shrinkable.

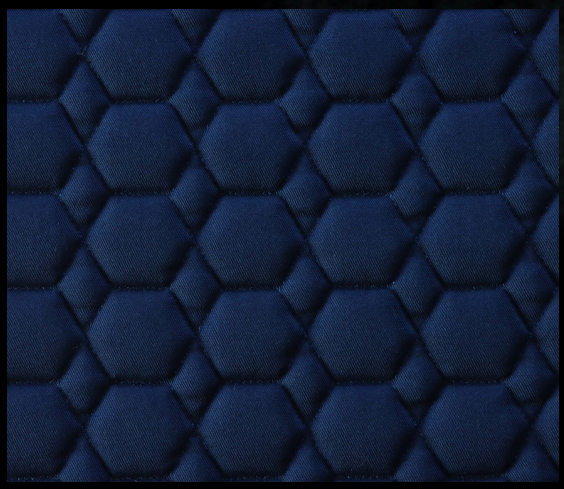

The lighter, antibacterial and breathable 400 g wadding guarantees **maximum breathability and faster drying.**

WHY CHOOSE THIS SADDLE PAD?

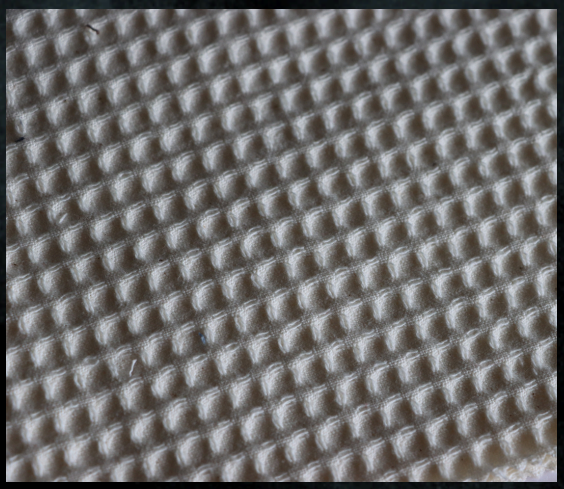

The main reasons for using a saddle pad are to protect the skin of the horse from friction and pull heat and moisture away from the horse's back.

If your saddle fits well, you will probably need just a classical, thinner saddle pad and will want to focus on optimising **heat dissipation** and **sweat wiping** .

The special cotton honeycomb lining guarantees an **improved moisture absorbing performance**. The lighter padding allows the saddle pad to **quickly** release moisture in the air and **dry.**

SHOCK ABSORPTION TECHNOLOGY

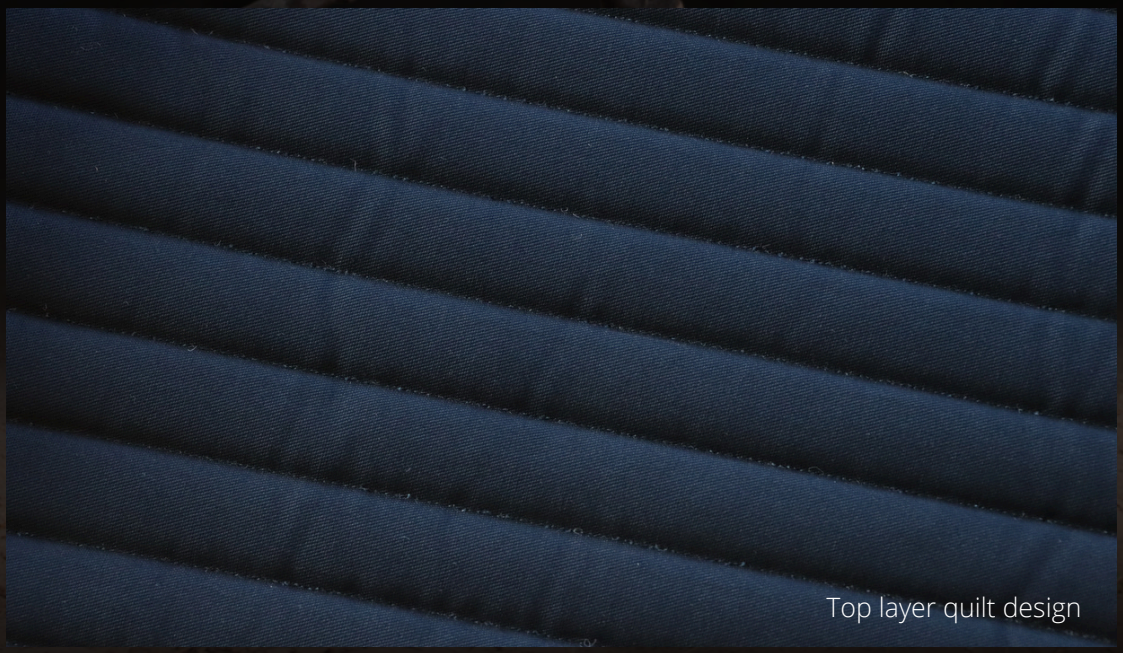

This technical Saddle Pad with straight line quilting has a top layer and lining made of **hypoallergenic**, **antibacterial** cotton blend. The lining is especially smooth to ensure a **soft touch** on the skin. It is also in natural colour, so it will not release any dye or pigments when the horse sweats.

The thicker 900 g breathable **shock absorbing** layer spreads pressure on the horse's back and lasts over time.

WHY CHOOSE THIS SADDLE PAD?

Depending on the movement of horse and rider, saddle-created pressure may alter blood flow in the horse's back. Muscles respond to point pressure by tensing, resulting in inhibited spine flexibility.

Saddle pads can help **distribute pressure more uniformly** across the horse's back. Spreading the saddle's weight helps **protect the musculoskeletal system** and allows for **maximum power and length of stride.**

OUR SIGNATURE SADDLE PAD

CLASSIC

The Saddle Pad

This beautiful saddle pad has been designed as a timeless piece, suitable for both home training and shows.
We wanted to create a playful colour contrast that will contour the saddle and adorn the back of the horse.
The same colour of the binding is repeated in the elegant piping, while the two elements are separated by a sleek, small satin cord in the same tone of the saddle cloth.
We aimed to have a product of dignified elegance, curated in detail yet not excessive.
The Knots Equestrian logo is embroidered on the left side.

Materials: Cotton, polyester
Variants: available in both Shock Absorption and Quick Moisture-Wick versions, we have conceived Classic - The Saddle Pad in the following colour variants: Navy-White, Black-Gold, Grey-Black, White-Navy-Grey.
Upon request, your logo can be embroidered on both sides or only on the left side, under the KE logo.

ABERDEEN

The Aberdeen Saddle Pad features an old style Scottish tartan pattern.

Classic and elegant, this item boasts all the technical characteristics of its fellow Saddle Pad models: breathable, anti-bacterial, moisture wicking and quickly drying.
The honeycomb cotton lining is a caress to the horse's skin.

The Knots Equestrian logo, in a design hand drawn specially for the release of the Saddle Pad Division, is embroidered on the left side.

SADDLE CLOTH COLOURS

Standard selection of saddle cloth colours.

SADDLE CLOTH COLOURS - SPECIAL

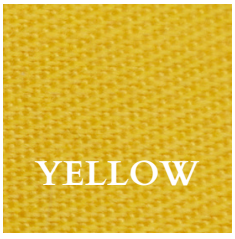

Special colours require minimum order quantities starting at 10 Saddle Pads.
Inquire via mail about specific colours.

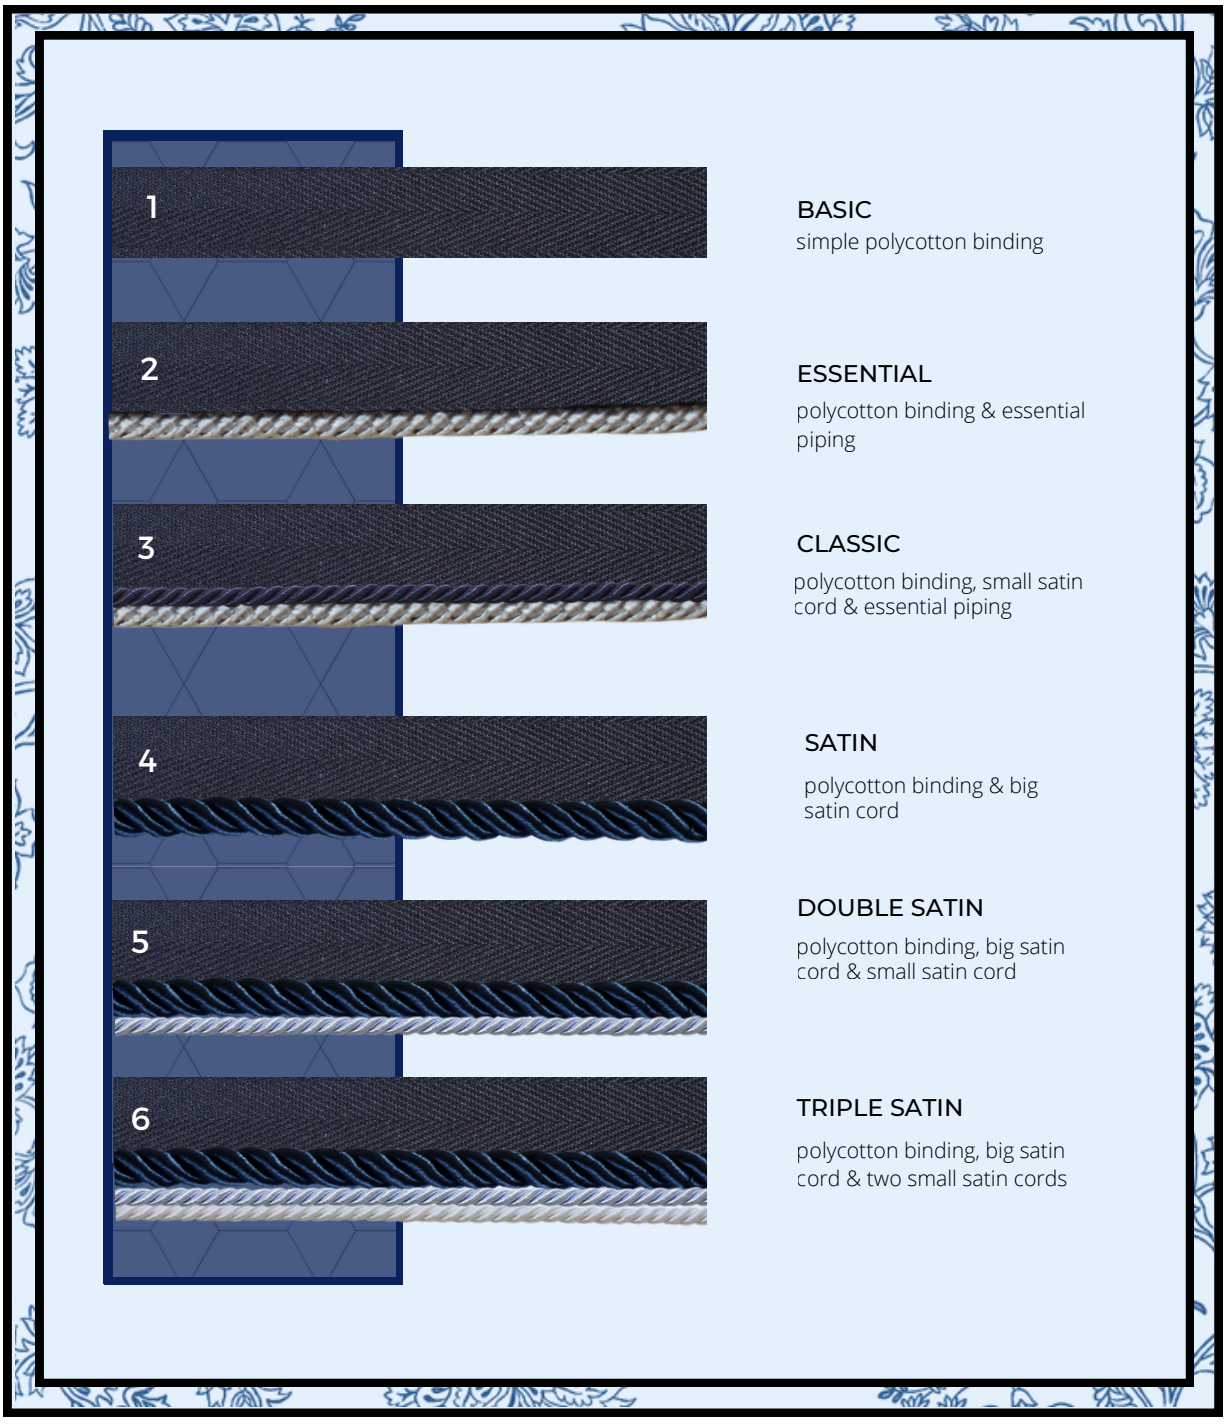

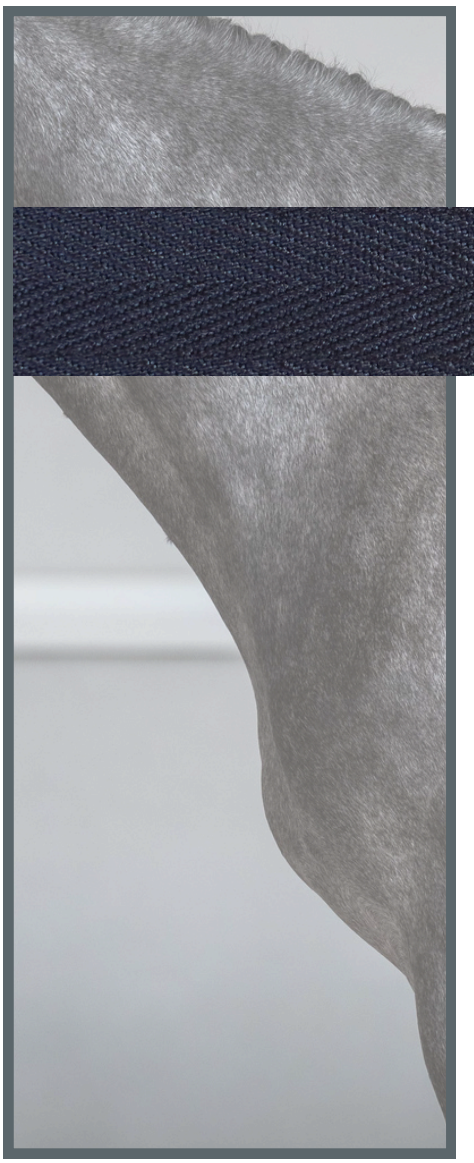

DESIGN SOLUTIONS

BINDING AND PIPING

The above presented are possible ways of combining bindings, pipings and cords to customise your Saddle Pad. Choose from option 1 , 2 , 3, 4, 5 or 6 and pick your colours from the colour cards on the following pages.

LOGO EMBROIDERY

As a customer at Knots Equestrian, you can have your logo embroidered on your products.

All logos have an initial digitising cost.
Logo digitising is necessary to make your logo readable by embroidery machines and it is a valuable initial investment that will be charged only once and can then be used lifelong for possible future orders.

Logo digitising costs may range between 35-50 €.
Each logo embroidery will cost 15 €.
